## GLACIER

*The Glacier range provides a powerful stand alone unit capable of dispensing very high volumes of water to meet peak commercial demand.*

### High capacity

With a chilling capacity 50 L/hr to 160 L/hr backed by instant ice bank delivery the Glacier range is a proven commercial model to cope with the very busiest of times.

### Space efficient

The compact under bench design of the Glacier range combines high capacity dispensing volumes with maximum space efficiency.

### High performance

The superior cooling system of the Glacier range features Direct Chill and Ice Bank *technology* that can operate in high ambient temperatures.

### Safety features

Total hygiene is a priority and, for this reason, only certified food contact materials are used for all components in contact with liquid and great care is taken in assembling each product. This eliminates the risk of contamination and allows for easy cleaning and maintenance.

### Durable strength

The sturdy coated steel external finish of the Glacier range is specifically designed to withstand high frequency use in the busiest of commercial environments.

### Three Columns

Options for the desired available combination of dispensing.

-  Chilled
-  Sparkling
-  Ambient

## GLACIER GL1300S

The Glacier range provides a powerful high-capacity under bench unit capable of dispensing very high volumes of chilled water to cope with peak commercial demand at the very busiest of times.
